

## **Overview**

Client: Rockyview

Rockyview Gas Co-op is a member-owned utility company providing natural gas to a rural franchised area. It prioritizes community benefit and empowerment by reinvesting profits back into the local area.

Country: USA

## **Business Challenges:**

They faced **inefficiencies in asset management** due to a **heavy reliance on paperwork**, hindering their ability to inspect, validate, and **maintain crucial assets like valves**, **pipelines**, **and tap stations** in the field.

Paperwork bottlenecked efficiency.

Asset inspection and maintenance suffered delays

Industry: Energy & Utilities

Centralized data absence led to errors

Inefficiency drove up operational costs

Critical asset failures risked due to negligence

- Real-time status updates provided the dispatch team with current asset data, aiding effective decisions and task allocation.
- Enhanced fieldworker efficiency was achieved through Fielda GIS, enabling smooth navigation and task understanding for swift issue resolution.
- Improved operational planning resulted from advanced issue awareness, aiding maintenance teams in preparing for necessary spares, and reducing downtime.
- Reports in Fielda included precise timestamps and locations, ensuring data integrity and meeting compliance needs.
- The Fielda dashboard offered Rockyview Gas management a comprehensive asset view, enabling strategic planning and management insights.

## **Business Outcomes:**

Boosted efficiency by eliminating paperwork and reducing delays.

Real-time updates enhance productivity and fieldworker efficiency.

Planning for spares cut downtime and improves issue resolution.

Tamper-proof records ensure compliance and accurate reporting.

Fielda dashboard offers insights for strategic planning and management.
